Webinar: PBX & Telephony Integration

Contents

1. TrueConf to VoIP calls
2. VoIP to TrueConf calls
3. How to register devices

Calling VoIP devices
from TrueConf

Connecting cloud-based PBX

For example, let's call my mobile phone

Adding a telephony subscriber

into the conference

Now let's connect to a local PBX

Calling my phone one more time

Adding VoIP phone into the conference. Same story.

Calling TrueConf **from VoIP**

Now let's add one line into Asterisk config file:

```
exten => _06X.,1,Dial(SIP/${EXTEN:2}\@192.168.63.179,360)
```

Let make a reverse call.
To do it, we need to create an alias.

Calling TrueConf user from VoIP phone

Calling TrueConf conference
from VoIP phone

How to register devices?

Let's play with Yealink video deskphone

Treat it like a regular user

Calling TrueConf conference.

Thank you. Questions?
