Male’ High International Virtual Learning School, a part of Mandhu College offers students to study from their home or any island in the Maldives or anywhere in the world. We guarantee to deliver our courses online. Our vision is to enjoy a reputation for quality teaching and learning and academic research.

Video conferencing was necessity for us and we needed it to engage in academic and practical research which will contribute to the socioeconomic and intellectual development of the Maldives. The issue is that the Maldives consists of approximately 1,190 coral islands grouped in a double chain of 26 atolls, along the north-south direction, spread over roughly 90,000 square kilometers, making this one of the most dispersed countries in the world. We employ 50 people in two offices in Maldives: at Male’ and at L.Gan.

We choose TrueConf for our online education because it is reliable and offers all our requirements. We use video conferencing in our Male’ High International School classes. As our students are dispersed all over Maldives we use video conferencing to deliver Maldivian Qualification Authority approved courses, degrees all over the Maldives. Mandhu College Virtual Campus delivers courses all over the Maldives. As we have this platform students can stay in their own islands and continue their education. Currently, we have 600 users connected to TrueConf video conferencing system.

We use TrueConf on a daily basis to deliver our online courses. Most of the time we use Symmetric (25 X 25), Asymmetric 1 X 25, and Role Based 1 X 20 conferences depending on the class’ objectives. We often use collaboration tools like Slide Show, Screen Sharing, and White Board to enhance the capabilities of online learning.

TrueConf implementation saves us time on troubleshooting and gives us more time to teach. TrueConf is a reliable video conferencing solution which we do not hesitate to recommend.

Badruddeen Naseem, Head of IT at Mandhu College: “We advise TrueConf to be used due to its reliability and as it suits all our requirements to deliver our courses online.”
