

TrueConf Group

TrueConf Group is a video conferencing endpoint for medium to large meeting rooms. TrueConf Group features native support for SIP and H.323 protocols with the built-in MCU. Thanks to the modular approach, the endpoint can be equipped with various AV peripherals while delivering FullHD video and crystal clear audio.

Dual screen and content sharing support

Easy-to-use IR remote control

Video call and conference recording

Far-end and local camera control

MCU

Built-in MCU for 12 FullHD connections

Customizable and powered by Linux

Quality and Reliability

TrueConf Group performs well in low bandwidth. Built-in noise reduction and echo cancellation provides high-quality audio, while H.265 video codec guarantees FullHD quality using half of the bandwidth compared to traditional room systems.

Ease of Use

TrueConf Group offers a wide range of collaboration tools for every need. Attend video meetings, share content, show slides, and control video layouts. Address book with call history will make your workflow even more efficient.
