

Video Conferencing for Healthcare

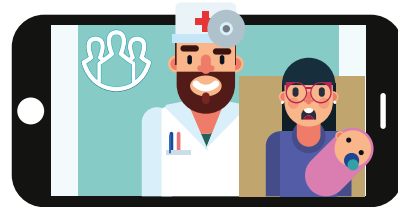

The modern world cannot be imagined without information technologies being widely used in healthcare. Thanks to video conferencing, physician office visits can now be easily substituted or at least supplemented by online video consultations.

For more than 10 years, we have been developing video collaboration systems and can guarantee the highest video conferencing quality, secure communications, and effective tools for any telemedicine project.

Video conferencing on any device: compatibility with a wide range of medical equipment and software.

Telemedicine consultations and doctor-patient communication systems.

Emergency consultations and doctor-doctor communication systems.

Distance learning and medical staff training.
Stream surgeries in 4K and 3D.

Video conferencing on ships, aircrafts and other hard-to-reach locations through high-quality satellite connection.

TrueConf video conferencing solutions are in full compliance with HIPAA requirements.
